SUMMARY

Recent BSc (Hons) Software Engineering graduate with hands-on experience in full-stack development, blockchain development, and AI integration through internships and projects. Skilled in web technologies, database management, and agile methodologies to build scalable applications. Passionate about leveraging programming expertise to innovate and enhance software systems in collaborative environments.

EDUCATION

Asia Pacific University (APU), Kuala Lumpur, MalaysiaNov 2023 - Nov 2025

BSc (Hons) in Software Engineering

- Current CGPA: 3.83
- Recognized on the Vice Chancellor's List 2023/2024 for academic excellence.

Asia Pacific University (APU), Kuala Lumpur, MalaysiaJun 2021 – Jul 2023

Diploma in ICT (Software Engineering)

- Overall CGPA: 3.81

WORK EXPERIENCE

A Serious AI, Full Stack Developer Intern, Kuala Lumpur, MalaysiaAug 2024 – Dec 2024

- Contributed to building SuDu.AI, a revolutionary AI-powered ERP system, while actively participating in Agile sprints as a full-stack developer using Node.js and Vue.js.
- Developed and optimized ERP modules such as Sales Invoice, Purchase Request, Sales Return, WM Inventory, and Stock Management
- Worked closely with cross-functional teams to enhance database schemas, UI components, tax calculations, credit limit validations, and historical data management to improve system efficiency
- Resolved over 60% of total bugs while doing sprints contributing to system stability

Shopper 360, Software Engineer Intern, Selangor, MalaysiaJul 2023 – Sept 2023

- Assisted in building an audit management system for Shell using Symfony, DevExtreme, and Microsoft APIs.
- Led SharePoint integration, developing functions for filtering and retrieving image links, showcasing adeptness in external data handling and process optimization.
- Optimized data retrieval queries, reducing load times by 20% through efficient use of SharePoint data structures.

CERTIFICATES AND QUALIFICATIONS

AWS-COA: Cloud Operations on AWSSep 2024

Full Stack Application Development Capstone Project (IBM)Apr 2024

Front End Developer Capstone (Meta)Apr 2024

Mastering Laravel Framework and PHP (Board Infinity)Apr 2024

Object Oriented Programming in Java (University of California San Diego)Apr 2024

SKILLS

Programming: Python, PHP, JavaScript, TypeScript, Java, C++, R, Solidity, HTML, CSS

Frameworks/Libraries: Node.js, Next.js, Vue.js, React, React Native, Laravel, Symfony, ASP.NET, Serverless, FastAPI

Cloud & Data: AWS (Lambda, S3, SQS, DynamoDB, Elastic Beanstalk), PostgreSQL, MySQL, MongoDB, Supabase, Prisma ORM

Tools/Practices: Git, REST APIs, Agile/Scrum, Model Context Protocol (MCP), Playwright, Postman, Stripe

PROJECTS

DeNate, AI-Driven Blockchain-based Charity Donation Platform

- A decentralized platform revolutionizing charitable giving through smart contracts for transparency and efficiency. Features include gamification through NFTs, automated fund distribution and AI-powered forecasting and chatbots.
- Award: Excellence in Bonus Achievement (Fintech and Blockchain) for Varsity Hackathon USM 2025.
- Tech Stack: Next.js, Solidity, Scroll, Pinata, MongoDB, Chainlink Automation, The Graph, Gemini API, Deepseek R1 via OpenRouter.

MemeFist, Decentralized Meme Battle Platform

- A Web3 platform for community-driven meme competitions, where users upload memes, compete in categories (e.g., Crypto, Gaming), gather upvotes, and win mintable NFTs for monetization in an integrated marketplace.
- Award: 1st Runner-Up in The Graph track at EthUprising Hackathon 2025
- Tech: Next.js, Solidity, Scroll, Pinata, Chainlink Automation, The Graph.

Couponly, AI-Driven Smart Coupon Platform with NFC Sharing

- A comprehensive smart coupon management system comprising an AI-driven user mobile app for shoppers, web scraper, admin-vendor web platform for coupon creation, tracking, and moderation, and an AI-powered recommendation system using collaborative and content-based filtering.
- Features include AI coupon search via semantic search, personalized recommendations and OCR coupon scanning.
- Tech: React Native, Next.js, Supabase, FastAPI, LightFM, Python, OneSignal, Playwright, Github Actions, Clerk Authentication, Resend

AlzGuard, Alzheimer's Missing Person Monitoring System

- A cloud-based platform to locate missing Alzheimer's patients with real-time alerts, GPS tracking, and coordination features for caregivers, volunteers, and healthcare providers deployed on Elastic Beanstalk.
- Tech Stack: Next.js, AWS DynamoDB, AWS Lambda, AWS S3, AWS SQS, AWS Elastic Beanstalk

YoYo, Furniture Management System

- Developed a desktop application using pure OOP concepts and Swing GUI for inventory and sales management in the furniture industry.
- Tech: Apache NetBeans, Java, Swing GUI

Purrfect Care, Appointment Booking Website

- Created a web platform for scheduling appointments with up to 4 roles.
- Tech: PHP, MySQL

CaptifyAI, SAAS

- Built a SaaS application for AI-powered caption generation with user authentication and payment integration.
- Tech: Next.js, Clerk (Authentication), Google Gemini AI, Drizzle ORM, Stripe (Payment).

File Management App

- A web application for file organization and management
- Tech: Vue.js, Laravel, phpMyAdmin
