SUMMARY

Malaysian Full Stack Developer with production experience in ERP, enterprise systems and extensive project experience in blockchain and AI integration. Skilled in modern web technologies, cloud infrastructure, and agile delivery. Passionate about building scalable, maintainable software in collaborative environments.

EDUCATION

Asia Pacific University (APU), Kuala Lumpur, Malaysia

Nov 2023 - Nov 2025

BSc (Hons) in Software Engineering (Dual Degree Program with De Montfort University, UK)

- CGPA: 3.89
- Recognized on the Vice Chancellor's List (2023–2026) for academic excellence.

WORK EXPERIENCE

atQuest Solution, Frontend Developer (Full Stack Responsibilities), Selangor, Malaysia

Dec 2025 – Present

- Built an Employee Self-Service system using Next.js, collaborating with UI/UX designers and business analysts to deliver a responsive and scalable frontend architecture.
- Designed and implemented data archiving pipelines for a loyalty point system via Linked Servers, SQL Server Agent and stored procedures, improving data lifecycle management and system performance.
- Investigated and resolved database utilisation spikes by optimizing queries and applying selective indexing to reduce load by 40% while balancing read/write performance.
- Extended a .NET enterprise system with new user roles to support additional features and improve access control in real-time lottery result processing workflows.
- Managed database migrations from client environments to on-premises servers, including IIS deployments and configuration setup to ensure smooth system transitions.
- Provided production support across multiple projects including legacy systems, ensuring stability and timely issue resolution.

A Serious AI, Full Stack Developer Intern, Kuala Lumpur, Malaysia

Aug 2024 – Dec 2024

- Contributed to building SuDu.AI, an AI-powered ERP system, while actively participating in Agile sprints as a full-stack developer using Node.js and Vue.js.
- Developed and optimized ERP modules such as Sales Invoice, Purchase Request, Sales Return, WM Inventory, and Stock Management.
- Worked closely with cross-functional teams to enhance database schemas, UI components, tax calculations, credit limit validations, and historical data management to improve system efficiency.
- Resolved over 60% of total sprint bugs, contributing to system stability and release quality

Shopper 360, Software Engineer Intern, Selangor, Malaysia

Jul 2023 – Sept 2023

- Assisted in building an audit management system for Shell using Symfony, DevExtreme, and Microsoft APIs.
- Led SharePoint integration with functions for filtering and retrieving image links; optimized data retrieval queries to reduce load times by 20%.

AWARDS AND CERTIFICATES

- 1st Runner-Up, The Graph Track – EthUprising Hackathon
- Excellence in Bonus Achievement (Fintech & Blockchain) – Varsity Hackathon USM
- AWS-COA: Cloud Operations on AWS
- Full Stack Application Development Capstone Project (IBM)
- Object Oriented Programming in Java (University of California San Diego)
- Back-end Application Development Capstone Project (IBM)
- Front-End Developer Capstone (Meta)

SKILLS

Programming Languages: Python, PHP, JavaScript, TypeScript, Java, C++, C#, R, Solidity

Frameworks: Node.js, Next.js, Vue.js, React, React Native, Laravel, Symfony, ASP.NET, Serverless, FastAPI, DevExtreme

Cloud & Databases: AWS (Lambda, S3, SQS, DynamoDB, Elastic Beanstalk), PostgreSQL, MySQL, MongoDB, Supabase, Prisma ORM, Azure SQL

Tools & Practices: Git, REST APIs, Agile (Scrum), Model Context Protocol (MCP), Playwright, Postman, Stripe, AI Assisted Coding

PROJECTS

DeNate, AI-Driven Blockchain-based Charity Donation Platform

- A decentralized platform revolutionizing charitable giving through smart contracts for transparency and efficiency. Features include gamification through NFTs, automated fund distribution and AI-powered forecasting and chatbots.
- Tech Stack: Next.js, Solidity, Scroll, Pinata, MongoDB, Chainlink Automation, The Graph, OpenRouter

Couponly, AI-Driven Smart Coupon Platform with NFC Sharing

- A full-stack smart coupon ecosystem comprising a shopper mobile app, web scraper, and admin/vendor web platform, with AI-powered features including semantic search, personalized recommendations (collaborative & content-based filtering via LightFM), and OCR coupon scanning
- Tech Stack: React Native, Next.js, Supabase, FastAPI, LightFM, OneSignal, Playwright, GitHub Actions, Clerk (Authentication), Resend

AlzGuard, Alzheimer's Missing Person Monitoring System

- A cloud-based platform to locate missing Alzheimer's patients with real-time alerts, GPS tracking, and coordination features for caregivers, volunteers, and healthcare providers deployed on Elastic Beanstalk.
- Tech Stack: Next.js, AWS (DynamoDB, Lambda, S3, SQS, Elastic Beanstalk)

CaptifyAI, SaaS

- Built a SaaS application for AI-powered caption generation with user authentication and payment integration.
- Tech Stack: Next.js, Clerk (Authentication), Google Gemini API, Drizzle ORM, Stripe (Payment).
